PREFACE

This is the next instalment of new material for *RPC I-III*, VII.1 and IX. As III (Nerva – Hadrian) and IX (Trajan Decius – Uranius Antoninus) have appeared since the last Supplement, the scope of this new *Supplement 4* is correspondingly greater. New material was also added to *RPC* online (<http://rpc.ashmus.ox.ac.uk>) for *RPC III* and *IX* in June 2016 at the same time as *RPC VII.1* was made available online. To avoid making this printed *Supplement* too big, multiple new specimens of known types have not always been included here.

This applies particularly to the ever-growing collections of CGT, ETB and A. Tricarico, but we owe their owners a special debt of gratitude from the way they are constantly checking, and often acquiring, newly appearing coins, especially on eBay, and regularly sending in information about them: every morning we all await the welcome arrival of several emails from each of them!

Only new material that has not already been published in the *Consolidated Supplement 1992–2015* has been included here. Please note as well that a more precise numbering system has been introduced for *RPC VII.1* when it was converted into digital format: some coin-types have now been subdivided into subtypes, hence the ‘decimal’ numbers (e.g. 123.1 or 123.2, but see *RPC III*, p. xvii, where this system was first used for the coinage of Alexandria in Egypt).

Ted Buttrey has asked us to improve the way in which we refer to volumes of *RPC* and to the *Supplements* and the *Consolidated Supplement*, and we are very grateful to him for making the suggestion, which will clarify future bibliographic referencing. Under the new procedure Latin numerals will be used only for volumes of *RPC* (thus I-X), and Arabic numerals for the *Supplements* (thus 1-3, and now the current 4), which will also bear a date (e.g. *Supplement 4*, 2017). The *Consolidated Supplement* will not be numbered but have a date: the first one appeared in 2015, and it is intended to produce a successor in a year or so when the accumulation of new material justifies the effort. For the moment all new material can be found by consulting the *Consolidated Supplement 2015* together with the present *Supplement 4*.

The production of this Supplement is, as ever, the work of Pere Pau Ripollès, and we are all very grateful to him for taking on this considerable task.

We are also grateful to the University of Oxford for hosting the *Supplements* and the previous *Consolidated Supplement*. Oxford seems now the natural place, since it is the location of *RPC Online*.

Future volumes will be published both online (catalogue only) and on paper. At the time of writing, the next volume to appear will be *RPC VI Elagabalus – Maximinus* (AD 218–38) by D. Calomino (London), with contributions by S. Matthies (Berlin) and A. Burnett (London). The online version will appear on the website during 2017, and the printed book about two years later.

Work is well under way again on *RPC IV* The Antonine Period (AD 138–92), by C. Howgego (Oxford) and V. Heuchert (Oxford), and we expect that two parts (Asia; and Alexandria) will be updated on the website, and completed and ready for printing within a couple of years. A similar schedule is envisaged for *RPC X Valerian – Diocletian* (AD 253–97), by W.E. Metcalf.

At the same time, teams are being assembled to work on *RPCV* (193-218), *RPC VII.2* (AD 238-44) and *VIII* (AD 244-49). *RPCV* is being organised by M. Amandry and A. Hostein. As for *RPCVII.2* and *VIII*, both volumes will be addressed simultaneously by an international team coordinated by M. Spoerri Butcher. Work on this project has started and the resulting volumes will be jointly edited by J. Mairat and M. Spoerri.

For an up-to-date list of all people involved, please see <http://rpc.ashmus.ox.ac.uk/project/>

Anyone with unusual material is invited to contact them.

Roman Provincial Coinage

Volume I

Further readings:

B. M. Kreiler, *Statthalter zwischen Republik und Prinzipat*, Europäische Hochschulschriften 3, Geschichte und ihre Hilfswissenschaften 1026 (Frankfurt a. M., 2006), updates the Fasti of the provincial governors between 43 and 23 BC. An appendix (pp. 289-94) gives the list of these officials, from Gaul to Egypt (see a review of the book by F. Kirbihler, *Gnomon* 83, 2011, pp. 327-331, with some reservations).

M. Horster, Coinage and images of the imperial family: local identity and Roman rule, *JRA* 26 (2013), pp. 243-61, discusses the presentation of the imperial family on local coins.

A. Suspène, Germanicus: les témoignages numismatiques, *CCGG XXIV* (2013), pp. 175-195, comments, pp. 184-193, on the 65 occurrences (40 cities + Judaean Kingdon) of Germanicus on the provincial coinage. Carteia

In the ancient city of Carteia a strip of flans have been found during the archaeological digs (A. Arévalo, J. Blánquez y L. Roldán, *El taller monetral de Carteia* (San Roque, Cádiz): recientes testimonios arqueológicos, XV Congreso Nacional de Numismática (Madrid, 28-30 octubre 2014), Madrid, 2016, pp. 897-914). It seems to belong to the type *RPC* 122 (*ca.* 7 g and 21-22 mm). The alloy of the flan strip is composed of copper (97 %) and a small quantity of tin. These analyses are similar to that of coins belonging to type *RPC* 122 from Carteia. This find has allowed the authors to consider the feasibility of the mint being located in the same place as the discovery of the strip.

**Ercavica**

The coin ex HSA 24081 (= Vico 8 Oct. 2012, lot 569) published by M. Gomis, 1997, *La ceca de Ercavica*, Madrid-Barcelona, lám. V, nº 41a, does not have the ligature **MVN** on the rev. legend as L. Amela, 2016, "Primeras emisiones de Erkauika / Ercavica", in *Varia nummorum V*, Barcelona, p. 128, pointed out. The left stroke of the letter V is lost and the end of the M is unconnected to the right stroke of the V.

Segovia

A useful catalogue of the coins kept in the Museo Arqueológico Nacional (Madrid) has been published by N. F. Marqués, *Las monedas de la ceca latina de Segovia en el Museo Arqueológico Nacional*, XV Congreso Nacional de Numismática (Madrid, 28-30 octubre 2014), Madrid, 2016, pp. 439-450

A compilation, as usual, of this mint has been provided by L. Amela, "De nuevo sobre la emisión de Segovia", in *Varia nummorum V*, Barcelona 2016, pp. 119-134.

Uncertain

A new specimen, with praefericulum to l. and patera to r., has been found in the excavations of Carteia, see A. Arévalo, J. Blánquez y L. Roldán, *El taller monetal*

de *Carteia* (San Roque, Cádiz): recientes testimonios arqueológicos, XV *Congreso Nacional de Numismática* (Madrid, 28-30 octubre 2014), Madrid, 2016, p. 899; it increases the prospect of locating the mint in the province of Baetica.

area of these two issues, especially that of Q. Oppius, which rules out the hypothesis of the minting of this issue in the East. They probably were struck in 46 and 45, maybe at Rome, as suggested by B. Woytek, *Arma et Nummi* (Vienna, 2003), pp. 271-83.

In *RPC I*, the coinage of Juba and Ptolemaeus was not re-examined. See now M. Spoerri Butcher, *Le monnayage d'argent émis par le roi Juba II de Maurétanie (I): catalogue des monnaies datées*, *S&R* 94 (2015), pp. 33-114 and pl. 5-20 (but look at the version on Academia.edu for the corrected numbering on the plates). 607 coins have been recorded, issued in the regnal year 6 (20/19 BC) and then between years 30 (AD 5/6) and 48 (AD 23-24). In addition, Ptolemaeus, Juba II's son, starts coining from AD 21/22. A die study is provided: 184 obverse dies were observed ($n/d = 3.3$; $D = 225$, with a 95% confidence interval of 210-241).

(a tridrachm = *RPC* I, 960) and Hierapytna (a drachm = *RPC* I, 961). This new coin could be from Hierapytna (ΙΕΡΑΠΥΤΝΙΩΝ), Gortyn (ΓΟΡΤΥΝΙΩΝ) Polyrhenium (ΠΟΛΥΡΗΝΙΩΝ). As a tetradrachm from Polyrhenium but signed by Cornelius Lupus (*RPC* I, 957) has the same reverse and legend, this new tridrachm is assigned tentatively to Polyrhenium.

Thracian kings

1710/9. On this specimen NY 1944.100.36290, see E. Paunov, A Roman Countermark on a Bronze Coin of Rhoemetalces I, King of Thrace, *AJN* 25 (2013), pp. 117-23, discussing at length the cmk PVBL (*GIC* 656), which is unique (*GIC* 656 was based on this coin). Paunov proposed that PVBL was the abbreviated name of Publius Vellaeus, legate of the governor C. Poppaeus Sabinus. In addition, he proposed that the cmk TR on *RPC* 1717/1 was the abbreviated name of Titus Trebellenus Rufus.

1767/5. CGT coll., 2.20 (6h).**Byzantium**

1774/1. The P coin was part of the Pellerin coll. and published by him in *Recueil de médailles de rois qui n'ont point encore été publiées* (Paris, 1762), pp. 35-6 and Pl. IV (under Cotys V); it was read as BYZANTIΩN/ΕΠΙ ΜΑΤΡΟΔΟΡΟΥ ΠΡΟΞΕΝΟΥ. Another drawing figures in M. C. Lenormant, *Trésor de numismatique et de glyptique. Numismatique des rois grecs* (Paris, 1849), p. 48 and Pl. XXIII, 15. Though Lenormant followed Pellerin's description, the drawing shows HPOΞENOY, not ΠΡΟΞΕΝΟΥ. F. Imhoof Blumer, *Bithynische Münzen*, JIAN 1 (1898), p. 17, also misdescribed the coin, as did the authors of *RPC*. A closer examination confirms the reading HPOΞENOY, *Heroxenos*.

ΕΠΙ ΑΓΑΛΛΕΩΣ HPOΞENOY; torch decorated with bands

1. A. Reich coll., 6.19. This coin was published by D. Calomino, Emperor or God? The Posthumous Commemoration of Augustus in Rome and the Provinces, NC 175, 2015, pp. 76-78 and Pl. 8, A1, suggesting the mint of Byzantium and a date in the second century AD. But the coin of Livia (see below), unknown at the time, makes this date unlikely and a Tiberian date probable.

Odessus

On the coinage of Odessus, see now I. Lazarenko, Coinage of Odessos during the Early Principate (Late 1st c. BC – AD 1st c.), *Numismatica, Sphragistica and Epigraphika* 7 (2011), pp. 23–58 and Pl. VII–XVI. Coins listed under *RPC I*, 1801 are distributed among Augustus, Agrippa, Tiberius and Caligula (with a precise listing of coins). In addition, coins without imperial portrait, but with the same cmks as those on coins with portrait, are given to the early Principate.

Head of Dionysos, with ivy wreath, r.; in front, thyrsus
ΡΟΔΙΩΝ; female cult statue standing front flanked by two thymiateria (?)

1. P 1998.915, 0.92. The head of Dionysos on the obverse has a thyrsos in front, like the head of Dionysos on the large bronzes *RPC* I, 2757 signed by Antigonos, the only issue of that series to add a thyrsos to the obverse. The female cult-statue flanked by two thymiateria (?) on the reverse of this new silver coin must be that on the reverses of the later large bronzes *BMC* 399/Cop 891, now in *RPC* III, 2687. We guess that the new silver coin is to be associated with the Antigonos bronzes (early-mid first cent. AD) rather than the later large bronzes with the female cult-statue, since the latter have Helios on the obverse, the temporary practice of putting Dionysos on the obverse having ceased just before the Neronian issues of Rhodes.

The mint attribution of the tetradrachms is discussed. Their low fineness (cu above 20%) differs from the purer silver at Laodicea and Aradus and compares well, as do the trace elements, with coins of Antioch (68%). A dating to 36 to 32/1 is considered likely. 41-48 obv. dies have been identified. The similar denarii (*RRC* 543), which are dated to 34/33 until no later than 32, have a different fineness and trace elements, and differ in other technical details; they were perhaps minted in northern Syria, with 63-80 obv. dies. The mixture of Greek and Roman elements in the inscriptions and designs is emphasised.

JUDAEO-Roman KINGDOM

Several articles in the volume (ed.) D. M. Jacobson and N. Kokkinos, *Judea and Rome in Coins* (London, 2012) are relevant to *RPC I*, mostly for general questions such as the degree of Romanisation (A. Burnett, R. Barkay, D. Syon) and the use of different scripts (A. Lykke).

Herod (40-4 BC)

4901-11. D. T. Ariel and J.-P. Fontanille, *The Coins of Herod. A Modern Analysis and Die Classification* (Leiden, 2012) analyse the coinage in detail. D. M. Jacobson, ‘Herodian bronze and Tyrian silver coinage’, *Zeitschrift des Deutschen Palästina-Vereins* 130 (2014) 2, pp. 138-54, has discussed the coinage of Herod, and the arguments against the attribution of Tyrian silver to him. See also D. M. Jacobson, ‘Herod the Great’s Royal Monogram’, *INR* 9 (2014), pp. 95-102.

4901-4. See R. Bracey, ‘On the graphical interpretation of Herod’s year 3 coins’, in (ed.) D. M. Jacobson and N. Kokkinos, *Judea and Rome in Coins* (London, 2012), pp. 65-84.

Herod Antipas (4 BC-AD 39)

4917A. D. Hendin, ‘A new coin type of Herod Antipas’, *INJ* 15 (2006), pp. 56-61, has published a coin inscribed TETPA []HΣ Δ corn ear/ []HP followed, perhaps but not definitely, by a W[] palm tree, which he attributed to Sepphoris. Thus the name ‘Herod the tetrarch’ is a reasonable reconstruction, but the interpretation of Δ as year 4’ is much less sure, since it would be unusual to omit any sort of indication for ‘year’, such as the L which occurs on all other coins of Antipas. It was found in trade with coins said to have been found in the Jordan Valley. A natural interpretation of that phrase might suggest somewhere further south than Galilee (and anyway Sepphoris, to which it is attributed, is nowhere near the valley), and the coin does look worrying like the prutot normally attributed to Jerusalem, with which indeed it was associated. Hendin has subsequently suggested (*in litt.*) that the coin might even be attributable to Herod I.

Philip (4 BC – AD 34)

4948corr. /2. Heritage World Coin Auctions Sale 3003, 8 March 2012, lot 20130, 6.94; **3. Baldwin’s Auctions Ltd 99, 4 May 2016**, lot 171, 6.32 (a thunderbolt under Tiberius’ head was unnoticed; a thunderbold is also present on *RPC* 4944 and 4946).

Procurators

4954. with L ΛΓ? N. Kokkinos, ‘The prefects of Judaea 6-48 CE and coins from the Misty period 6-36 CE’, in ed D. M. Jacobson and N. Kokkinos, *Judea and Rome in Coins* (London, 2012), pp. 85-122, at 90-93, has discussed several candidates of coins of Augustus that might be dated to the year ΛΓ (33). If correctly read, the coins open up the question of the era used on the procuratorial coins.

Agrippa I (37-44)

4980. D. B. Hendin and R. Bachar, ‘A So-Called Agrippa I Coin Reattributed to Gaba’, *INR* 11 (2016), pp. 119-26. plausibly reattribute the coin to Gaba, perhaps in the late first century AD.

4982. See A. J. M. Kropp, ‘Crowning the Emperor. An unorthodox image of Claudius, Agrippa I and Herod of Chalkis’, *Syria* 90 (2013), pp. 377-89.

4985/4. P 2015/18, 7.94 (a variant with ΒΑΣΙΛΕΥΣ ΜΕΓΑΣ ΑΓΡΙΠΠΑΣ ΦΙΛΟ-ΚΑΙΣ-ΑΡ/ΚΑΙΣΑΡΙΑ Η ΠΡΟΣ ΤΩ ΣΕΒΑΣΤΩ Λ). In addition, many regular specimens have appeared on CoinArchives.

autochthonous in the first millennium A.D.* (Istros, 2015), pp.

'Pseudo-autonomous' coins

The attribution of the following three types of 'pseudo-autonomous' coins (**35A-C**) to the reign of Gordian III is based on H. von Fritze, 'Die autonome Kupferprägung von Kyzikos', *Nomisma* 10 (1917), pp. 1-32. They were mentioned in the original publication of

RPC VII.1, but without catalogue number. Note that the average weight of types 35B and C (3.39 and 3.58 g) is higher than that of similar coins from the period of Gordian III (2.39 g), which might actually speak against an attribution to his reign.

35A AE. 26–7 mm, 11.60 g (2). Axis: 6 (1). [1]

von Fritze, *Nomisma* 10 (1917), group V, no. 41a

 lot 937 = Münz Zentrum 68, 1990, lot 210, 12.36
 (probably same dies as 35A/1).

According to von Fritze, the obverse die of 35A/1 is shared with a coin showing the name of a magistrate whithin a wreath (von Fritze, *Nomisma* 10 (1917), group V, no. 41b). Unfortunately, his name is not legible on the only specimen recorded by von Fritze (Großfürst Michailowitsch coll.).

CILICIA

Seleucia ad Calycadnum

1331–3. Same obv. die: see Forum Ancient Coins, topic 109181.0, 24 Nov. 2016, where C. Clay suggests to read ΓΑ ΙΟΥΑΙ rather than ΓΑΙ ΟΥΑΙ (ΤΡΕΒΩ ΓΑΛΛΟC): “So did the mint of Seleucia misunderstand a title of Gallus’ too, writing not only ‘Sabin’ instead of ‘Afin’ for Volusian, but ‘Iouli’ (Latin ‘Julius’ or ‘Julianus’) instead of ‘Vibi’ for Gallus? [...] If these three obv. dies – one of Gallus and two of Volusian – indeed give the emperors wrong names, then we can tentatively date their creation to *c.* late summer–fall 251 AD”. An interesting and very convincing idea.

Tarsus

1376 corr. The obv. inscription reads ΕΡΕΝΝΙΑΝ ΑΙΤΡΟΥΚΙΛΛΑΝ ΣΕ (not ΑΙΤΡΟΥΚΕΙΛΛΑΝ). C. Clay has pointed out (*in litt.*) that the obverse die of 1376/1–2 (same obv. die as 1368/1–18, 1369/1–3, 1372/1, 3–4, 7–11, 1375/1–8, 1378/1–3, 1379/1–6) is here altered in order to correct the erroneous ANNIAN to ΕΡΕΝΝΙΑΝ.

Flaviopolis

1533 corr. The correct description of the obverse busts is: *bare-headed*, draped and cuirassed bust of Etruscus, r., confronting *bare-headed*, draped and cuirassed bust of Hostilian, l.
